

Dear parents/carers,

As you aware, your child has recently taken the Welsh Government's online numeracy procedural test. The feedback is ready to be viewed through Hwb. To access this, ask your child to log on to Hwb using their username and password. If they do not have these, they can be collected from Mr Spear (IT manager) or the IT dept.

Go to Hwb Tools and then personalised assessment feedback. This will display a one page document that shows what style of question your child performed well in and what style of question they need to develop their skills with. There are also hyperlinks to example questions. If there is no feedback it means that your child has not taken the test yet either due to absence or another reason and they will complete the test soon.

No scores are released at this stage. However, scores will be available following the second test later in the year.

Regards,

Stuart Pownall

Head of Geography & Numeracy Coordinator
